COURSE OUTCOME MAPPING

MAPPING COURSE OUTCOMES LEADING TO THE ATTAINMENT OF PROGRAM OUTCOMES

COURSE TITLE: PROBABILITY AND STATISTICS

COURSE CODE: MCA22101

CREDITS: 3

DEPARTMENT: M.C.A

PROGRAMME OUTCOMES Or POS(MCA):

PROGRAM OBJECTIVES (POs)

- **PO1: Engineering knowledge**: Apply the knowledge of mathematics, computer science, various programming languages, databases and operating system to develop a software system.
- **PO2: Problem analysis**: Identify, formulate, review research literature, and analyze complex engineering problems to reach substantiated conclusions using first principles of mathematics, natural sciences, and engineering sciences.
- **PO3: Design/development of solutions**: Design solutions for complex engineering problems and System components or processes that meet the specified needs of public health and safety.

- **PO4: Continuous learning**: Recognize the needs and improves the ability to engage in independent and life-long learning as trends changes in technology.

PROGRAMME SPECIFIC OUTCOME:

PROGRAM SPECIFIC OUTCOMES (PSOs)

- **PSO1**: To consolidate foundation of mathematics, computer science and problem solving methodology for effective implementation in the area of software development. To inculcate advance knowledge about various sub-domains of computer science and applications.

- **PSO2**: To prepare graduates to achieve peer-recognition, as an individual and in a team, through demonstration of good analytical, design and implementation skills.

- **PSO3**: To improve the ability to test and analyze the qualities of various subsystems and to integrate them together to evolve a larger and better computing system, that includes the concept of mathematics, computer engineering and related disciplines to meet the user objective .

	COURSE OUTCOMES	BLOOM'S TAXONOMY LEVEL
CO1	**Understanding** of Linear Algebra will boost the ability to understand and apply various data science algorithms.	II (UNDERSTAND)
CO2	**Calculate** probabilities by applying probability laws and theoretical results, knowledge of important discrete and continuous distributions, their inter relations with real time applications.	III (APPLY)
CO3	**Understanding** the use of sample statistics to estimate unknown parameters.	II (UNDERSTAND)
CO4	**Evaluating** the proficiency in learning to interpret outcomes.	V (EVALUATE)
CO5	**Application of** Correlation Analysis, regression lines and multiple regression analysis.	III (APPLY)

	COURSE OUTCOMES	BLOOM'S TAXONOMY LEVEL
CO1	Define Statements, connectives, how to apply connectives ,working with sets, subsets and represent them in venn diagrams	(I)Remember
CO2	Explains about relations ,ordering, functions, lattices and Boolean algebra illustrating with examples.	(II)Understand
CO3	Explains about algebraic structures and groups by applying various theorems and solving for an appropriate result	(III)Apply
CO4	Compare the Homogeneous Recurrence Relations and Non-Homogneous Recurrence Relations along with examples.	(IV)Analyze
CO5	Constructs graphs, trees and planar graphs	(VI)Create

MAPPING COURSE OUTCOMES LEADING TO THE ATTAINMENT OF PROGRAM OUTCOMES

COURSE TITLE: ARTIFICIAL INTELLIGENCE

COURSE CODE: MCA20203

CREDITS: 4

DEPARTMENT: M.C.A

PROGRAMME OUTCOMES Or POS(MCA):

PROGRAM OBJECTIVES (POs)

- **PO1: Engineering knowledge**: Apply the knowledge of mathematics, computer science, various programming languages, databases and operating system to develop a software system.
- **PO2: Problem analysis**: Identify, formulate, review research literature, and analyze complex engineering problems to reach substantiated conclusions using first principles of mathematics, natural sciences, and engineering sciences.
- **PO3: Design/development of solutions**: Design solutions for complex engineering problems and System components or processes that meet the specified needs of public health and safety.

- **PO4: Continuous learning**: Recognize the needs and improves the ability to engage in independent and life-long learning as trends changes in technology.

PROGRAMME SPECIFIC OUTCOME:

PROGRAM SPECIFIC OUTCOMES (PSOs)

- **PSO1**: To consolidate foundation of mathematics, computer science and problem solving methodology for effective implementation in the area of software development. To inculcate advance knowledge about various sub-domains of computer science and applications.

- **PSO2**: To prepare graduates to achieve peer-recognition, as an individual and in a team, through demonstration of good analytical, design and implementation skills.

- **PSO3**: To improve the ability to test and analyze the qualities of various subsystems and to integrate them together to evolve a larger and better computing system, that includes the concept of mathematics, computer engineering and related disciplines to meet the user objective .

	COURSE OUTCOMES	BLOOM'S TAXONOMY LEVEL
CO1	**Defines** Artificial Intelligence, Problem Solving, Heuristic Search Techniques.	(I)Remembering
CO2	**Explains** about Knowledge Representation using Predicate Logic.	(II)Understanding
CO3	**Explains** about Expert Systems and Probability Theory.	(II)Understanding
CO4	**Compares** the various Artificial Neural Networks	(IV) Analyzing
CO5	**Constructs** the various Advance Knowledge Representation Techniques.	(VI)Creating

COURSE TITLE: INTERNET OF THINGS

COURSE CODE: MCA21302A

CREDITS: 3

DEPARTMENT: M.C.A

PROGRAMME OUTCOMES Or POS(MCA):

PROGRAM OBJECTIVES (POs)

- **PO1: Engineering knowledge**: Apply the knowledge of mathematics, computer science, various programming languages, databases and operating system to develop a software system.
- **PO2: Problem analysis**: Identify, formulate, review research literature, and analyze complex engineering problems to reach substantiated conclusions using first principles of mathematics, natural sciences, and engineering sciences.
- **PO3: Design/development of solutions**: Design solutions for complex engineering problems and System components or processes that meet the specified needs of public health and safety.

- **PO4: Continuous learning**: Recognize the needs and improves the ability to engage in independent and life-long learning as trends changes in technology.

PROGRAMME SPECIFIC OUTCOME:

PROGRAM SPECIFIC OUTCOMES (PSOs)

- **PSO1**: To consolidate foundation of mathematics, computer science and problem solving methodology for effective implementation in the area of software development. To inculcate advance knowledge about various sub-domains of computer science and applications.

- **PSO2**: To prepare graduates to achieve peer-recognition, as an individual and in a team, through demonstration of good analytical, design and implementation skills.

- **PSO3**: To improve the ability to test and analyze the qualities of various subsystems and to integrate them together to evolve a larger and better computing system, that includes the concept of mathematics, computer engineering and related disciplines to meet the user objective .

	COURSE OUTCOMES	BLOOM'S TAXONOMY LEVEL
CO1	Understand the concepts of IoT and IoT enabling technologies	II (UNDERSTAND)
CO2	Explain IOT and system management.	II (UNDERSTAND)
CO3	To develop an understanding Programming Raspberry Pi with Python	III(APPLY)
CO4	To understand IoT Physical Servers and Cloud Offerings	II (UNDERSTAND)
CO5	Gain knowledge on IoT programming and able to develop IoT applications	IV(APPLY)

COURSE OUTCOME MAPPING

MAPPING COURSE OUTCOMES LEADING TO THE ATTAINMENT OF PROGRAM OUTCOMES

COURSE TITLE: SOFTWARE ENGINEERING

COURSE CODE: MCA21305

CREDITS: 3

DEPARTMENT: M.C.A

PROGRAMME OUTCOMES Or POS(MCA):

PROGRAM OBJECTIVES (POs)

- **PO1: Engineering knowledge**: Apply the knowledge of mathematics, computer science, various programming languages, databases and operating system to develop a software system.
- **PO2: Problem analysis**: Identify, formulate, review research literature, and analyze complex engineering problems to reach substantiated conclusions using first principles of mathematics, natural sciences, and engineering sciences.
- **PO3: Design/development of solutions**: Design solutions for complex engineering problems and System components or processes that meet the specified needs of public health and safety.

- **PO4: Continuous learning**: Recognize the needs and improves the ability to engage in independent and life-long learning as trends changes in technology.

PROGRAMME SPECIFIC OUTCOME:

PROGRAM SPECIFIC OUTCOMES (PSOs)

- **PSO1**: To consolidate foundation of mathematics, computer science and problem solving methodology for effective implementation in the area of software development. To inculcate advance knowledge about various sub-domains of computer science and applications.

- **PSO2**: To prepare graduates to achieve peer-recognition, as an individual and in a team, through demonstration of good analytical, design and implementation skills.

- **PSO3**: To improve the ability to test and analyze the qualities of various subsystems and to integrate them together to evolve a larger and better computing system, that includes the concept of mathematics, computer engineering and related disciplines to meet the user objective .

	COURSE OUTCOMES	BLOOM'S TAXONOMY LEVEL
CO1	**Explain** Software Engineering and to know which model is suited according to the user specifications.	II (UNDERSTAND)
CO2	Explain about Software Requirement and Specifications (SRS) and to know the concepts of designing a project and what are the models used for designing.	VI (CREATING)
CO3	Understand the places or parts of the project where design is to be conducted and the types of designs and how to identify and overcome the risks in a software project.	III (APPLY)
CO4	Explain the importance of testing and to understand the importance of testing and understand various testing procedures and measurements used for testing the productivity of a software project.	VI (CREATING)
CO5	**Understand** the importance of maintenance, reengineering and software process improvement in a software project.	II (UNDERSTAND)

COURSE OUTCOME MAPPING

MAPPING COURSE OUTCOMES LEADING TO THE ATTAINMENT OF PROGRAM OUTCOMES

COURSE TITLE: SOFTWARE TESTING

COURSE CODE: MCA21401C

CREDITS: 3

DEPARTMENT: M.C.A

PROGRAMME OUTCOMES Or POS(MCA):

PROGRAM OBJECTIVES (POs)

- **PO1: Engineering knowledge**: Apply the knowledge of mathematics, computer science, various programming languages, databases and operating system to develop a software system.
- **PO2: Problem analysis**: Identify, formulate, review research literature, and analyze complex engineering problems to reach substantiated conclusions using first principles of mathematics, natural sciences, and engineering sciences.
- **PO3: Design/development of solutions**: Design solutions for complex engineering problems and System components or processes that meet the specified needs of public health and safety.

- **PO4: Continuous learning**: Recognize the needs and improves the ability to engage in independent and life-long learning as trends changes in technology.

PROGRAMME SPECIFIC OUTCOME:

PROGRAM SPECIFIC OUTCOMES (PSOs)

- **PSO1**: To consolidate foundation of mathematics, computer science and problem solving methodology for effective implementation in the area of software development. To inculcate advance knowledge about various sub-domains of computer science and applications.

- **PSO2**: To prepare graduates to achieve peer-recognition, as an individual and in a team, through demonstration of good analytical, design and implementation skills.

- **PSO3**: To improve the ability to test and analyze the qualities of various subsystems and to integrate them together to evolve a larger and better computing system, that includes the concept of mathematics, computer engineering and related disciplines to meet the user objective .

	COURSE OUTCOMES	BLOOM'S TAXONOMY LEVEL
CO1	Express importance of testing in software development process, glass-box testing, black-box testing, and how to report and analyse bugs	II (UNDERSTAND)
CO2	Design different types of test case	VI (CREATING)
CO3	Organize how to build testing strategy, establishing software testing methodology and software testing techniques	III (APPLY)
CO4	Identify the definition of quality, metrics for software quality and inspection techniques	III (APPLY)
CO5	Identify the definition of quality, metrics for software quality and inspection techniques	III (APPLY)
