## BUSINESS INTELLIGENCE & DATA VISUALIZATION WITH DB

By – ROSE M VASE

SKILL ENHANCEMENT TRAINER

**Objective:** BI and analytics enable more informed business decisions. BI and analytics also create transparency and visibility across siloed networks within and outside an organization, meaning data isn't limited to one department or location.

**Outcome:** Business intelligence helps organizations become data-driven enterprises, improve performance and gain competitive advantage. They can: Improve ROI by understanding the business and intelligently allocating resources to meet strategic objectives

BI reduces the times a company has to lose a customer, revenue, or deal with inaccurate information or slow processes. It is essential in gaining a competitive edge for companies to make faster and accurate decisions by leveraging the existing data, at the right time, and improve decision making
