

B.Com

Global Management Accounting

B.Com Global Management Accounting

(Integrated with Chartered Institute of Management Accountants – CIMA)

The B.Com Global Management Accounting program at Loyola Academy is a future-focused undergraduate degree designed for students aspiring to build global careers in finance, accounting, and business strategy.

This program integrates the traditional Bachelor of Commerce (B.Com) curriculum with the globally recognized CIMA qualification, enabling students to gain both academic knowledge and professional expertise simultaneously.

On successful completion of the CIMA qualification, students earn the prestigious CGMA (Chartered Global Management Accountant) designation. As this qualification is globally recognized and prepares students to work across international markets, the program is aptly called a Global Management Accounting degree—a degree designed for global careers in finance and business.

What is CIMA?

The Chartered Institute of Management Accountants (CIMA) is one of the world's largest and most respected professional bodies for management accountants, with a presence across 170+ countries. Unlike traditional accounting qualifications that focus primarily on bookkeeping and compliance, CIMA is designed to create business leaders in finance—professionals who can interpret numbers, drive strategy, and influence key business decisions. CIMA is part of the Association of International Certified Professional Accountants, further strengthening its global recognition and connecting students to a vast international professional network.

CIMA professionals are trained not just in accounting, but in:

- Business performance management
- Strategic decision-making
- Financial leadership

Paper Exemptions & Structure

Students enrolled in this program benefit from significant exemptions:

- 14 CIMA papers exempted based on B.Com integration
- Only 2 case study examinations to be completed:
 - Management Level Case Study
 - Strategic Level Case Study

This enables students to fast-track their journey toward becoming a CGMA-qualified professional.

Why CIMA? | Key Benefits

Global Recognition

- Recognized across 170+ countries
- CGMA designation valued by multinational corporations worldwide

High Employability

- Prepares students for strategic and analytical roles
- Develops decision-making and leadership skills

Career-Oriented Learning

- Focus on real-world business scenarios
- Strong emphasis on case studies and application-based learning

Integrated Advantage

- Earn a degree + global professional qualification simultaneously
- Saves time and cost compared to pursuing CIMA separately

Career Opportunities & Employability

Graduates of this program are equipped for high-growth, global career paths:

Job Roles

- Management Accountant
- Financial Analyst
- Business Analyst
- Risk Analyst
- Corporate Finance Executive
- Strategy Consultant

Top Recruiters
