*The Department of B.Com (Computer Applications) at Loyola Academy Degree and PG College is committed to delivering a dynamic blend of commerce and technology-oriented education. Established in 2010, The Department is designed to provide students with a strong foundation in core commerce disciplines such as accounting, finance, and management, while simultaneously developing competencies in computer applications, programming, and digital business tools. This integrated approach equips students with analytical, technical, and problem-solving skills required to thrive in today's competitive and technology-driven business environment. The department emphasizes practical learning through projects, industry exposure, workshops, and interactive sessions, ensuring that students gain real-world insights alongside theoretical knowledge. With a well-structured curriculum, experienced faculty, and modern infrastructure including computer labs and e-commerce facilities, the department fosters holistic development and prepares students for diverse career opportunities in commerce, IT, and entrepreneurship. The Department is committed to shaping industry-ready professionals by equipping students with practical skills, a strong ethical foundation, and the confidence to innovate, adapt, and lead in a rapidly evolving digital economy.*
